

Kedros Team Extension

Summary

Kedros requirement was to extend their core testing team with experienced tester with acceptance testing background. SANAE provided the resource from its' internal headcount.

Project length: 19 months

Technology to test: web based application focused on transportation, working on various platforms and browsers (IE, FF, Ch, iOS, Android, WP)

Used tools: Enterprise Tester, Enterprise Architect, JIRA, Confluence, SoapUI, DbVisualiser

Keywords: transportation, GIS, SAT, manual testing, multiple platform testing

Solution

Introducing the candidate

SANAE swiftly responded to Kedros needs by providing several suitable candidates from its' internal headcount. Client selected one candidate and agreed on long-term contract with team extension model.

Working on the project

For 19 months, our resource provided expertise in documentation analysis, performing tests and bug reporting. In addition, he assisted with the project tasks before and during acceptance on third party site. His activities included daily communication with project manager, information gathering and supporting other testing team members.

Benefits

Kedros established long-term relationship with SANAE gaining individual and professional approach, access to highly qualified and experienced professionals with warranty. The main benefit for Kedros was flexibility of resource – work upon monthly requests, making the tester available just for the time of the project need.
