

ARTIN Team Extension

Summary

ARTIN requested junior tester as addition to their team to help them even out workload before deployment of their TeePee project and help to cover regression testing after migration to cloud service. SANAE provided the resources from its' internal headcount.

Project length: 6 weeks

Technology to test: Web based portal (developed in Java) for countrywide management of units and users

Used tools: JIRA, Confluence, Cypress

Keywords: DB migration, E2E testing, test automation

Solution

Introducing the candidate

SANAE responded to ARTIN needs by providing several candidates from its' internal headcount. Client selected the candidate that was assigned immediately to the project.

Working on the project

For 6 weeks, our resource provided testing workforce, performing tests, bug reporting, creating and running test automation scenarios, maintaining user manual, providing support to clients and presenting demos of functionality for clients.

After launching the project to a cloud solution, SANAE tester performed thorough regression testing.

Benefits

ARTIN benefits from cooperation with SANAE on long-term basis gaining individual and professional approach, access to highly qualified and experienced professionals with warranty. The main benefit for ARTIN was quick response and flexibility of resource – work upon short term request, making the tester available just for the time of the project need.
